EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

Cancel claims 19-35.

DRAWINGS

2. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 02/02/2006 have been approved.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

Claims 1-8,10-13 and 15-18 are allowed over the references of record because none of these references disclosed or can be combined to yield the claimed invention such as a heterojunction field effect type semiconductor device, comprising a GaAs substrate; a channel layer formed over said GaAs substrate; a first semiconductor layer including no aluminum formed over said channel layer; a cap layer of a first conductivity

Art Unit: 2826

type formed on said first semiconductor layer, said cap layer creating a first recess on said first semiconductor layer; first and second ohmic electrodes formed on said cap layer, respectively; a second semiconductor layer of second conductivity type formed on said first semiconductor layer within said first recess, said second semiconductor layer being isolated from said cap layer; a gate electrode formed on said second semiconductor layer; and a third semiconductor layer interposed between said first semiconductor layer and said cap layer and having a second recess, said second semiconductor layer passing through the second recess of said third semiconductor layer to reach said first semiconductor layer, said third semiconductor layer comprising a GaAs layer formed on an AlGaAs layer, as recited in claim 1.

As was noted in the Paper mailed 6/16/05, Kato et al. discloses a heterojunction field effect type semiconductor device with all the limitations of claim 1 except Kato et al.'s two part GaAs/AlGaAs third semiconductor layer has a first AlGaAs part 511 formed on a second GaAs part 510. Claim 1 requires the second GaAs part of the third layer to be formed on the first AlGaAs part.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
